

ONUR KAPUCU

Full-Stack Software Engineer · AI-Native Product Builder · Founder, TriHonor

Tampere, Finland | kapucuonur@hotmail.com | +358 44 235 9429

[GitHub](#) · [LinkedIn](#) · [Portfolio](#)

Work authorization: Finnish permanent residence permit, full right to work in Finland, no visa sponsorship required. Citizenship application submitted and pending.

SUMMARY

Full-stack software engineer with 3+ years shipping production applications across Web, Mobile, and Hardware. Builds end to end, frontend, backend, infrastructure, and has taken multiple AI-integrated products from idea to real, paying users, including two apps live on Google Play. Works daily with agentic AI tooling (Claude Code, Cursor) as a core part of the development workflow, not just autocomplete. Currently based in Tampere, Finland.

EXPERIENCE

TriHonor, Founder & Software Engineer

Tampere, Finland | Nov 2022 – Present | trihonor.com

- Founded and operate TriHonor (Y-tunnus: 3131622-7), a registered Finnish software company delivering full-stack web, mobile, wearable, and AI integration projects, 30+ shipped to date.
- Architected and deployed production applications on self-hosted Raspberry Pi 5 infrastructure using Docker, Nginx, PostgreSQL, and Cloudflare Tunnels for zero-trust external access, eliminating cloud hosting costs while maintaining production reliability.
- Built **CoachOnur AI**, a production AI coaching platform with real-time Garmin data sync (HRV, sleep, activity), Gemini-powered training decisions, and Stripe subscriptions, native Android app on Google Play.
- Built **BikeFit AI**, a computer-vision bike-fitting tool using real-time pose estimation on a Raspberry Pi 5 + Hailo-8 NPU, native Android app on Google Play under TriHonor Oy.
- Built **SRE Daemon**, an autonomous self-healing agent that monitors systemd/Docker logs and metrics, diagnoses failures through a multi-tier LLM pipeline, and repairs them with a human-in-the-loop approval gate, running in production across TriHonor's own infrastructure.
- Built and scaled **Learn-Finnish.fi**, an AI-powered SaaS platform generating personalized Finnish lessons via Gemini, serving 100+ active subscribers with Stripe billing.
- Engineered **WatchToMac**, a native macOS Swift utility solving Garmin file-transfer issues on Apple Silicon via low-level USB/MTP protocol implementation.
- Delivered 30+ client projects with a 100% satisfaction rate, specializing in React frontends, FastAPI/Node.js backends, and PostgreSQL/MongoDB data layers.

METIQ Solutions, Freelance Software Engineer & Nordic Market Lead

Remote | Nov 2025 – Apr 2026

- Built Garmin Connect IQ smart-home control apps integrating with openHAB, combining wearable tech with IoT platforms for the Nordic market.
- Led Nordic marketplace expansion, engaging 10+ B2B targets (including Bisly, HUUM, and Airobot) and coordinating partnership conversations directly with C-level stakeholders.
- Collaborated with engineering teams in Bratislava and Zagreb on solution architecture and AI-driven features.

Outlier AI, AI Training Specialist

Remote | 2024

- Built internal dashboards (Flask, Groq API) that improved team workflow efficiency by 25%.
- Contributed to RLHF pipelines improving LLM code-generation accuracy for production use.

FEATURED PRODUCTS

- **CoachOnur AI**, AI sports coaching platform. Garmin OAuth2 sync (HRV/sleep/activity), Gemini-powered coaching decisions, Stripe subscriptions, native Android app. *FastAPI, React, PostgreSQL, Stripe, Garmin API, Gemini, Kotlin.* Live: coachonurai.com · [Google Play](#). Architecture write-up: github.com/kapucuonur/AI-Coach-Demo
- **BikeFit AI**, computer-vision bike fitting. Real-time pose estimation (YOLOv8/Hailo-8 NPU) converts camera input into centimeter-accurate fit recommendations. *Python, FastAPI, React, Gemini API, Kotlin.* Live: bike.coachonurai.com · [Google Play](#). Architecture write-up: github.com/kapucuonur/bikefit-Demo

- **SRE Daemon**, autonomous self-healing infrastructure agent. Watches systemd/Docker logs and metrics, diagnoses root cause via an LLM cascade, repairs issues with sandboxed validation and human-in-the-loop approval. *Python, SQLite, systemd, Docker, multi-provider LLM fallback*. Architecture write-up: github.com/kapucuonur/sre-daemon-demo
- **Hotel Booking System**, full-stack reservation platform with real-time availability tracking, Docker containerization, Cloudflare Tunnel routing, deployed on Raspberry Pi 5. *React, Node.js/Express, MongoDB, Docker, Nginx, TailwindCSS*
- **WatchToMac**, native macOS utility solving a Garmin file-transfer issue on Apple Silicon (M1/M2/M3) via low-level USB/MTP protocol implementation. *Swift, SwiftUI, AppKit, system programming*
- **Learn-Finnish.fi**, AI-powered language learning SaaS with AI-generated personalized stories; 100+ active subscribers. *Next.js, React, Gemini API, Stripe, Firebase*
- **Ice Bath Tracker**, Garmin Connect IQ wearable app for cold-plunge monitoring: real-time skin temperature, heart-rate adaptation, recovery analytics. *Monkey C (Garmin CIQ SDK), wearable sensor APIs*

TECHNICAL SKILLS

- **Mobile & Native:** Swift, SwiftUI, AppKit, Flutter, Dart, Monkey C (Garmin), React Native, Android (Kotlin)
- **Frontend:** React.js, Next.js, TypeScript, TailwindCSS, Redux, Material-UI
- **Backend:** Node.js, Express.js, Python, FastAPI, Flask, REST APIs
- **Databases:** PostgreSQL, MongoDB, Firebase, SQLite
- **DevOps & Infrastructure:** Docker, Docker Compose, Nginx, Cloudflare Tunnels, Git/GitHub, CI/CD (git-based auto-deploy), self-hosted infrastructure, Raspberry Pi Linux administration
- **Cloud:** Microsoft Azure (certified), Firebase, Vercel, AWS basics
- **AI/ML & Agentic Tooling:** Claude Code, Cursor, GitHub Copilot, Google Gemini API, OpenAI API, Groq API, TensorFlow, RLHF, LLM integration
- **Testing:** Robot Framework, automated testing, software QA
- **Data:** SQL, data analytics, statistics, Pandas, NumPy

EDUCATION

Metropolia University of Applied Sciences, Software Engineering
Helsinki, Finland | Ongoing

- Artificial Intelligence with Python (3 ECTS), Python, Data Analytics & Statistics
- Software Testing Automation using Robot Framework (3 ECTS), SQL and Relational Databases
- Finnish for Foreigners 1–4 (20 ECTS), structured Finnish-language coursework, in progress

Clarusway, Full Stack Development Program

Online | 2024

- IT Fundamentals, Web Development Essentials, Web Development with React, Backend Development

CERTIFICATIONS

- Cybersecurity Fundamentals (Microsoft Skills for Jobs, 2026)
- Azure Fundamentals, Exploring Microsoft Azure (Microsoft Skills for Jobs, 2026)
- Microsoft Power Platform Fundamentals, Elements of Cloud and Cybersecurity (2026)
- Practical AI (Microsoft, Apr 2025)
- Web Development with React, Backend Development (Clarusway, 2024)

LANGUAGES

- **English:** Advanced (C1)
- **Turkish:** Native
- **Finnish:** Intermediate (B1), actively studying via Metropolia's Finnish for Foreigners 1–4 coursework

KEY ACHIEVEMENTS

- Shipped 30+ production applications (100% client satisfaction) and published two Android apps on Google Play under TriHonor Oy.
- Built and operate self-hosted production infrastructure, zero unplanned downtime, and grew an AI coaching platform to 100+ paying subscribers.
